Mohammad Shahenshah

Staff Software Engineer @RapidAI | Full Stack Developer | Clinical
AI | AWS Certified Architect | AI ML Enthusiast
Bengaluru, Karnataka, India

Summary

Tech Lead with 10 years of experience building and scaling fullstack applications. At RapidAI, I lead the Apps Team across iOS, Android, and Web, delivering AI-powered healthcare solutions integrated with DICOM viewers and built on FHIR standards.

Modernized app workflows by:

- Migrating to Okta for unified authentication
- Implementing SAGA patterns for orchestration
- Moving to a monorepo architecture
- Containerizing backend services
- Upgrading the AWS SDK
- Standardizing workflows and DICOM data handling

Core Skills:

Frontend: React, Angular

Backend: Node.js, Python, Java

Cloud & DevOps: AWS (EKS, ALB, ECR), Docker, Kubernetes

Architecture: Microservices, Monorepos, Event-driven systems

AI/ML in Healthcare:

Executive PG (CGPA 3.88) with hands-on use of Convolutional Neural Networks (CNNs), Neural Networks, and Generative AI to extract insights from medical imaging and clinical data. Familiar with tools like TensorFlow, PyTorch, Hugging Face, and Scikit-learn to build and evaluate models in diagnostic and triage workflows.

Experience

RapidAI

Staff Software Engineer

June 2024 - Present (1 year 10 months)

Bengaluru, Karnataka, India

As a Full Stack Engineer at RapidAI, I lead the design and development of scalable, AI-driven medical imaging solutions within a secure, multi-tenant

Kubernetes architecture. My role bridges the intersection of healthcare, cloud-native systems, and AI explainability.

Architected and implemented full-stack solutions using Node.js, Angular.js, Swift, and Python to deliver real-time insights in clinical workflows.

Integrated AI heatmaps and explainability features into radiology viewers like OHIF and rapidDicomViewer, enhancing clinician decision-making for stroke, occlusion, and aneurysm detection.

Leveraged DICOM protocols, ITK, and FHIR standards to ensure seamless visualization and interoperability of medical data.

Maintained rigorous HIPAA compliance while designing patient-centric, secure features across the platform.

Played a key role in Okta migration from AWS Cognito, enabling a smooth lift-and-shift transition to enterprise-grade identity management.

Designed cross-module contracts for AI result propagation between Module, RMA, and RDV systems, ensuring cohesive data flow and interactive diagnostics.

Enhanced product usability by introducing configuration-driven UI/UX upgrades, including advanced monitoring pages, output tracking, and visual feedback mechanisms.

Always striving to bring scalable innovation to healthcare, with a focus on performance, security, and user-centric design.

DENSO

Senior Manager

August 2023 - June 2024 (11 months)

Bengaluru, Karnataka, India

- Developing a next gen SaaS based application to implement Vehicle Digital Inspection.
- Developing a solution to spearhead last mile connectivity and freshness score for the cold chain products.
- Oversee the complete product development lifecycle, including design, implementation, and deployment.
- Lead a team proficient in React, Node.js, Postgres, and AWS for mobility as a service development.
- Implement advanced machine learning algorithms for image processing applications.

- Developed a gateway and a server to streamline communication between different sensors and IOT devices like Teltonika.
- Developed configurator application capable at handling different message type and codec and at the same time can analyze the result into meaningful output.
- Developed a tracking application that can provide route optimization and fleet management as well can track the delivery with estimated time.
- Design and implement scalable solutions using Kubernetes, Docker, ALB, ECR, and EKS on AWS.

CGI

Lead Analyst

March 2021 - August 2023 (2 years 6 months)

Bengaluru, Karnataka, India

- Developed one of a kind serverless file transfer service using SFTP protocol, AWS transfer family, S3 buckets.
- Developed the service to document upload and then do processing on the uploaded documents. Created a react based application and used pre-signed URL's for S3.
- Led the initiative to transform and migrate the tech from monolith architecture to serverless architecture.
- Worked on the Gateway project to transform the user experience for CPA and CFA license holders.
- Designed and developed solution for License management system.
- Designed and developed solution for Compliance management system.

CSG

Senior Development Consultant

March 2019 - March 2021 (2 years 1 month)

Bangalore

- Worked on one a kind Ascendon product, which is a SaaS based complete solution for telecom needs.
- Developed the customizable widget management system to display different data for easy decision making.
- Developed the system for Mobile number portability.
- Developed the application to check for fraud detection and do credit check.
- Led the initiative to develop different layers for the micro services and enable continuous integration and continuous deployment.

Mindtree

Senior Software Engineer

February 2016 - February 2019 (3 years 1 month)

Bengaluru Area, India

- Worked as a lead to develop the Miraqlle services which were developed to analyze the market data and trend.
- Developed the authentication system layer using the JWT mechanism.
- Worked on weight and balance system for aircrafts using Java - Spring boot.
- Performance analysis of API's and fix the bottlenecks.
- Bug fixes and writing unit test cases for the application

Education

International Institute of Information Technology Bangalore

Postgraduate Degree, Executive PG Programme in Machine Learning and

AI · (August 2023 - November 2024)

Harvard University

CS50's Introduction to Computer Science, Computer Science · (June 2023 - January 2024)

Harvard University

CS50's Introduction to Game Development, Computer Science · (June 2023 - December 2023)

Harvard University

CS50's Introduction to Artificial Intelligence with Python, Artificial Intelligence · (June 2023 - December 2023)

Bundelkhand University

Bachelor of Technology (B.Tech.), Computer and Information Sciences and Support Services · (2011 - 2014)
